

## Interior Plantscape

- All plants professionally picked and installed based on decorator specification
- Weekly visits by trained, fully equipped technicians
- Watering and fertilization as necessary for the overall health and appearance of your plants
- Cosmetic care for plants and containers, including dusting, cleaning, trimming, and pruning as necessary
- Regular inspections for pest and plant disease with appropriate treatment if necessary
- Monitoring environmental conditions that affect the health of your plants such as light, temperature, and traffic patterns, including rotation of plants to promote balance growth
